

## FIRST RESPONDER INITIAL CERTIFICATION/LICENSURE OR RE-LICENSING PRACTICAL EVALUATION

### 3.14 Smoke Inhalation Injury

#### Key Performance Outcomes

- Manage a patient with smoke inhalation

#### Patient Instructions

C/C:	"I'm having trouble catching my breath"
Hx/C/C:	For the last 45 minutes you and two co-workers have been trying to extinguish a fire that started in a plastics re-cycling depot. It finally got out of control and you have called the Fire Department. You started having difficulty breathing about 15 minutes before the arrival of the Fire Department.
Pain Assessment (PQRST)	You don't complain of any pain but you do have an "irritation" in your throat and chest.
Relevant symptoms:	Shortness of breath and irritation in throat and chest
Relevant past Med Hx:	None, but you currently have a urinary tract infection
Medications:	Cipro
Allergies:	Almonds
Other:	You were able to walk away from the fire and meet the Fire Department. If asked, you did inhale smoke and fumes coming off the burning plastics. You are portraying a 40 year old male patient. You are found standing but leaning forward with your hands on your thighs, SOB.

## Scenario Information

### Dispatch Information

You are sent to a structural fire. Dispatch informs you that it is a plastics re-cycling depot.

### Scene Information

Shortly after your arrival your Chief calls you away from fighting the fire to deal with a patient. You are directed to a man who appears to be in his 40's standing well back from the fire. The patient is leaning forward with his hands on his thighs. The patient appears to be having difficulty breathing.

### Witnessed or Secondary Information (as required)
